Representative <Insert Name>

As an architect and constituent in your district, I am writing to ask that you support H.5216, a bill updating the energy code for new commercial and public buildings only. H.5216 is on the House calendar, up for second reading, and there was no opposition in the House LCI Subcommittee or full Committee. Not only does this bill have the support of AIA South Carolina (representing over 1,100 architects), it also has the support of the building industry, including Carolinas AGC, and the American Council of Engineering Companies - South Carolina.
This is a great first step in getting the energy codes back to where they belong and where all other codes reside – with the SC Building Codes Council. I stand available to answer any questions you may have and appreciate your support of architect professionals in South Carolina.

All the best,
