2020 Offshore Surveys Initiated

Equinor Wind US is the lease holder of the New England offshore wind Lease Area OCS-A 0520 known as Beacon Wind. As part of the site development process, geophysical and geotechnical surveys will commence in the Beacon Wind area in early August 2020. The project will be performed by MMT US Inc. using the Offshore Supply Ship, Stril Explorer, which is equipped with the innovative Surveyor Interceptor SROV:  
[https://www.mmt.se/innovations/srov/](https://www.mmt.se/innovations/srov/)

Beacon Wind surveys are expected to be conducted thru October 2020.

An offshore fisheries representative will be onboard during the geotechnical and geophysical surveys to minimize and avoid any conflicts with fishing vessels and gear.

A scout boat will also be deployed prior to survey start to monitor the survey area of gear and will inform the fisheries liaisons who will contact gear owners for coordinated efforts.
