Solutions for Success

Dr. Steve Johnson, farm and ag business management specialist at Iowa State University Extension and Outreach, uses actual case study farms to explore successful methods to restore depleted working capital by improving grain merchandising, managing costs, and overcoming farm financial emotions.

Managing Weather Risk: Preparing for 2017

Eric Snodgrass, Department of Atmospheric Science at the University of Illinois and co-founder of Agribile, Inc., explores current weather patterns to help you prepare for next year's growing season. Find out how to forecast weather with free tools of the trade.

- Class size is limited; the online form will close when the class is full
- Program is **FREE** for FCI member-owners
- Buffet meal is included
- Email questions to ask@farmcreditIL.com

FCI educational workshops are intended to equip members with valuable information and strategies. FCI neither endorses nor recommends specific farm consultants, advisors, or services.
