

X-Plain for Cerner Millennium® & HealthLife™

- The largest library of patient education materials in English and Arabic
- Localized for Islamic values and GCC norms
- Documentation of patient comprehension

Why X-Plain?

- Increases patient satisfaction
- Saves staff time
- Improves outcomes
- Engages patients through interactivity
- Supports multiple platforms

The Patient Education Institute has partnered with Cerner Corporation to provide the X-Plain patient education system through the Millennium® EMR, HealthLife™ patient portal, and bedside patient stations.

X-Plain offers thousands of evidence-based patient education titles in Arabic and English. The content is accessible to patients of any health literacy level. The text is fully narrated, and the multimedia programs ask questions to engage patients and verify understanding.

X-Plain libraries include discharge instructions, informed consent aids, self-care titles, healthy living programs, and acute and chronic disease programs. Each health topic is available in the following formats: illustrated handout, video, and the award-winning, interactive tutorial.

For more information on how leading hospitals in the GCC are using X-Plain, contact us at info@patient-education.com.
