

Back to School Tropicals!

Know someone heading off to school this September? Send them off in style with an easy-care houseplant! Here at Cole's we have lots of sweet plants to help spruce up a workspace.

Zz Plant

☀️ Low-light

💧 Every 2-3 weeks

Peperomia

☀️ Medium to bright indirect light

💧 Once a week when soil becomes dry

Snake Plant

☀️ Very Low-light

💧 Once a month

Spider Plant

☀️ Bright indirect light

💧 Once a week

Dracaena

☀️ Medium indirect light or low-light

💧 Every 2 weeks

Pothos

☀️ Medium indirect light

💧 Every 1-2 weeks

Houseplants are a great addition to any room and have been proven to reduce stress, assist with concentration, and boost productivity! Not only that, but they purify the air too - contributing to healthy indoor air quality.

Hot Houseplant Care Tips

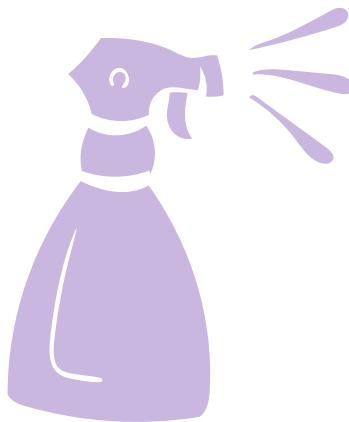

1.

Not sure when to water? Your best bet is to **water** your houseplant once the soil becomes dry.

2.

Mist your tropicals with a spray bottle or plant mister, they'll love you for it!

3.

Rotate your houseplant every month or so to promote even growth!

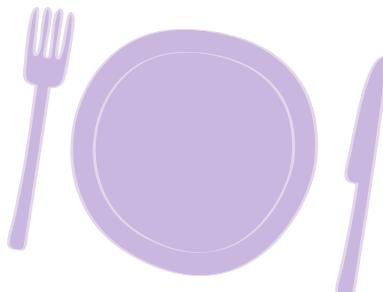

4.

Wipe the leaves with a damp cloth when they become dusty (dust blocks the sunlight they need to grow!)

5.

Plants need food just as much as they need water! **Fertilize** your houseplants every two weeks from March to September.

6.

Place houseplants **together** in your home, they create their own tropical atmosphere when grouped together!
