

Travel and Geographic Medicine Clinic

Planning a family trip abroad? We can help!

In Boston Children's Travel and Geographic Medicine Clinic, we provide comprehensive services to children and their families before international travel. We're your one-stop destination for pre-travel evaluations, consultations, and vaccinations — **and we can see your whole family at one appointment.**

We offer families information about illness and injury prevention while traveling, as well as preventive medicine (such as anti-malaria medication) and the following vaccines:

- Yellow fever (ages 9 months and older)
- Japanese encephalitis
- Typhoid
- Rabies
- TicoVac
- Chikungunya
- Meningococcus
- Polio
- MMR
- Tdap
- HepA
- And many others

As soon as you know your travel plans, please book an appointment with us!
