The Solution For Independent Retail Pharmacies Providing Compliance Packaging for Patients in Long-Term Care Settings

WHO IS THIS PROGRAM INTENDED TO BENEFIT?

ComboMed is a GeriMed solution designed to enhance the profitability and growth of the retail 'combo' pharmacy – a retail pharmacy provider serving retail customers, while also (under the same retail pharmacy license) providing compliance packaging to patients in any of following LTC setting(s):

- Assisted Living
- Skilled Nursing
- Hospice
- Correctional
- Psychiatric
- Group Homes
- Medical at Home
- Intermediate Care Facilities – ICF-IID

ComboMed will not only impact your pharmacy's bottom line and strategic growth, but as we help you achieve the benefits of the program, we in-turn empower you to have a lasting and broader impact on the community that has come to rely on your invaluable, personable pharmacy services.

HOW DOES MY PHARMACY BENEFIT?

Through our industry-leading and validated processes, your retail 'combo' pharmacy can experience most of the benefits typically associated with a 'closed-door' pharmacy, all under your existing retail DEA pharmacy license, and without many of the elaborate, resource-consuming requirements of going 'closed-door'.

Here are a few of the many benefits of this unique solution:

- Maximized LTC reimbursement through our competitively-negotiated payer rates – **no more retail rates for your LTC claims!** (Average reimbursement enhancement of \$3 – \$4 per Med D LTC claim)
- **ZERO DIR FEES!** Yes, you read that correctly – no **DIR fees** on your LTC claims associated with the GeriMed chain code
- **No per claim (GPO-assessed) network adjudication fees!**
- Additional cost-of-goods discounts and competitive pricing through our expansive line of pharma (discounts ranging from **3-10% off WAC**) and non-pharma purchasing contracts, to include our **Employee Discount Program** (**up to 60% off** on everyday personal purchases on over **1,500 products and services**).
- Purchasing contracts that are compatible with retail buying group (retail GPO) affiliations
- Contracted branded pharma purchases are made through your existing wholesaler(s), ruling out any adverse effect on your wholesaler Purchase Volume Rebates (PVR)
- Low-cost, flat, transparent membership fees – **no growth penalties or hidden fees!**
- Minimal implementation operational changes required
- Compatible with most software vendors

"Before learning about the ComboMed program, our pharmacy was struggling to experience healthy margins for our LTC related Med D claims and had to settle for retail rates and DIR fees. Since implementing the program in 2018, our bottom line has been revitalized and our overall growth enhanced. If you're an AAP member servicing any of the defined LTC settings out of your retail pharmacy location, this program is a no-brainer."

Erik Nelson, PharmD, FAAMFM, FACA

PC, Sixth Avenue Medical Pharmacy

ComboMed™ customer since 2018

AAP member since 2013
