

KARST STAGE

BEST PRACTICES

*USING GROUP TRANSPORTATION
DURING COVID-19*

Managed Loading & Unloading

Maintaining social distancing standards begins at boarding. Using either existing markers (parking stripes) or introducing physical demarcations will help manage the loading and unloading processes.

On-Board Distancing

Social distancing is possible while using coaches through varying configurations from 9-26 passengers to accommodate varying comfort levels. PPE (personal protective equipment) is recommended as an additional onboard precaution.

Vehicle Cleaning Procedures

Vehicle Cleanliness has always been a cornerstone of our service. We are now using CDC approved products and methods to directly battle COVID-19 including both daily deep cleaning and cleaning between passenger groups.
