3:00 pm

An Introduction to iNaturalist and CT DEEP Wildlife Division Projects

Kyle Testerman, from the DEEP Wildlife Division will lead this webinar to help novice and expert users of iNaturalist take part in some local Citizen Science projects. This app is used to share population information on plants and animals. Researchers use this app to help them collect data on our natural world. Connecticut DEEP will be conducting some research projects this year and would like as many people to take part by using iNaturalist. Learn the ins and outs of this app and improve your outdoor knowledge. [Registration is required.](#) Appropriate for families and individuals. Assistance in registering contact susan.quincy@ct.gov

Thursday, July 23, 2020

3:00 pm

The Eastern Coyote

Join Master Wildlife Conservationist Paul Colburn, as he provides a webinar on the life and history of the Eastern Coyote. This informative program will cover the natural history of the coyote, diet, behavior and reproduction. It will also provide some practical recommendations for optimum coexistence with our wild friend. [Registration is required.](#) This webinar is open to all ages. For assistance please contact susan.quincy@ct.gov

Saturday July 25, 2020

10:00 am

Monitoring Monarchs

Monarch butterflies are active in CT. Kellogg Environmental center participates in the Monarch Larvae Monitoring Project and you can too. Take some time to learn about the monarch and their life history and how we monitor the fields of milkweed to count eggs, larvae and look out for adults. [Registration is required for this free webinar.](#)

Saturday August 22, 2020

10:00 am

The Art of Drawing Birds

Birds are a highly diverse group of animals that come in all sorts of shapes and sizes! Explore the relationship between form and function with this program that brings together Science and Art. Join Evelyn Kubik, staff naturalist, in learning about the adaptations that make birds so successful, and then follow a step-by-step tutorial on how to draw birds. All drawing skill levels welcome! [Registration is required](#) for this webinar. Suitable for children and adults.

The History of Our Things

Join Pat Sweeney, historian for the Osborne Homestead Museum, in a series of programs that highlight the technology and diversity of Connecticut industrial history. Each program will highlight the significance of the objects found in our collections and how they play a role in advancing our daily lives and culture.

[Register for each](#) of the presentations individually.
