

IT Director
Annual Report 2020
By: RANDY IRWIN

This brief report summarizes the activities of the IT portfolio for the 2019/2020 year under the term as IT director by Randy Irwin. We kept the BYC.ca website up to date with the latest Joomla patches on a monthly basis. Added a few pages under the member area to capture new information such as the Incident Form. Late summer early fall with the help of Paul Moore we engaged a web designer to modify the current website to a more user friendly clean look and feel by updating the Joomla template applied to all pages. We received some content updates under the youth program and will be soliciting updates to other content areas by the different content owners. Early in the year we received notification that the old Yahoo groups' site would be decommissioned so we copied all the old content from there and created a backup In case people want access to that information in the future. As one of the last activities of the year we investigated technical options for a virtual Town Hall and AGM and helped the board choose a consultant to facilitate these for the club.
