DATASYM
Feature Guide

Change Round Up for Charity

About this feature

The round up feature allows a merchant to round up the change to collect charitable donations. The donations may be for the merchant itself, for example a thrift store or hospital gift shop, or for a third party charity.

- The function uses a new SKU type.
- When enabled the price of the items are rounded up to the nearest even dollar amount.
- There is a maximum of one rounded item per transaction.
- The item should be nontaxable, and cannot occur in void or refund mode.
- The SKU should be assigned to a special subdepartment assigned to a hash department.

Programming this feature

- PGM 130 DECIMAL ENTER to add a SKU to trigger the Round Up feature. The description of the SKU will display on the on-screen prompt.
- Set the price to ROUND
- Set Open to NO
- Set Preset to YES
- Leave all other options at default
- Set the last prompt of AUTO PROMPT to YES
- Press DECIMAL to EXIT

Using this feature

There are two way to use this feature:

- Ring in the sale as well as the rounded SKU item; the rounded SKU item will ring up as a zero priced item until the SUBTOTAL button is pressed.
- Once pressed it will add the rounded dollar amount.

- Ring your sale and when SUBTOTAL or a payment media key is pressed the system will prompt with the SKU description, and YES or NO.
- On keyboard based systems, the prompt will display YES. ENTER to accept, or change it to NO by toggling the ZERO key and then pressing ENTER.
