MOTOR SHAFT CUTTING TOOL

Cutting a motor shaft within the confines of the blower wheel is frustrating and time consuming - until now.

Meet the Shaft Blaster™. This technician-invented, time and money saving tool cuts motor shafts in squirrel cage blowers and condenser fans in about 20 seconds.

3 EASY STEPS TO CUTTING MOTOR SHAFTS:

1. 2. 3.

Slide the Shaft Blaster™ over the motor shaft. Tighten the thumb screw.

Attach the Shaft Blaster™ spindle to any power drill.

Begin cutting with ease! Start the drill and apply pressure to cut the shaft.
