## Home screen “app” button

And, you can put a “app” button on your **iPhone** if you **open Safari**, look to the very bottom, and click on the box with the up-arrow. There's an option there to create a “home-screen” button, like the one on the right

(\*) Events in the Sanctuary, other than Sunday mornings, are by permission of the event leader. You'll see a looping video if permission has not been granted for streaming.
