

### Food Safety Guidelines

It is important for us to maintain a sanitary and food safe environment for the well-being of participants and meal recipients. There are several food safety standards that we will adhere to.

- Hairnets covering the full surface of the head and any loose hair.
- Face mask covering the nose and mouth.
- No jewelry
- No Food, Drink or Tobacco within 5 feet of the packaging including water bottles and chewing gum.
- Hand Cleanliness is required by all participants using hand sanitizer prior to packaging food. Some participants depending on where they are in the assembly line will be required to wear gloves.
- Anyone diagnosed or exposed to COVID 19 or any illness should not participate. We recommend vaccination for COVID prior to participating.

We would like to get an idea of how many might attend to safely social distance. Please RSVP to [twebster49@gmail.com](mailto:twebster49@gmail.com) or message by phone 407 644-9937.

See you there!

Theo Webster, Project Coordinator, Outreach and Social Justice
