CONTAMINATION CAUSING A PROBLEM AT YOUR RECYCLING DROP-OFF?

We are currently providing community recycling drop-off locations with free signage to better address issues of contamination at drop-off locations. Signs are available as a metal stand or sandwich board. Common contaminants or issues at drop-off locations include:

- Cardboard not collapsed, taking up more space than necessary
- Styrofoam
- Illegal Dumping
- Recyclables in plastic bags
- Batteries and textiles

If you are interested in signage for your community drop-off locations, please contact Angela Rivera at 513-946-7746 or angela.rivera@hamilton-co.org.
