

## Online Introduction to COOP

This online webinar is being offered to support program's ability to continue providing care. Child care is an essential support for families and communities. The 2014 CCDF Reauthorization requires child care providers to make a plan to recover from disasters/emergencies in order to lessen the effect on children and families if an event occurs that impacts a program's ability to provide care. A Continuity of Operations Plan (COOP) helps programs prepare for interruptions in normal business operations, both on a large scale and for every day interruptions. This online webinar will review the COOP components and provide tools to help child care providers better prepare for potential disruptions in their operations in order to minimize the impact on child care services.
