## TEACHING PRO-SOCIAL SKILLS: PREVENTING CHALLENGING BEHAVIORS

Young children who exhibit challenging behaviors often lack the pro-social skills they need to be successful in relationships with peers and adults in early childhood settings. Tier 2 of the Pyramid Model emphasizes the importance of modifying the universal practices we use with all children to teach pro-social skills for those children who continue to struggle.

Understanding the relationship between pro-social skills and challenging behaviors is key, especially considering curricula, classroom design, teaching practices, and teaching styles. Participants will be introduced to Pyramid Model practices that promote pro-social skill development and will better understand their role in preventing challenging behaviors.
