Accelerated Early Childhood Education Courses

**Feb. 13–
March 11**

**March 27 –
April 29**

**May 15 –
June 10**

Growth and Development of the Young Child

Major theories and research findings in the physical, cognitive, language, and social/emotional domains of development of young children from conception through age 8 are the focus of this course. Emphasis is on understanding children's development in the moment and the power of observations.

Health, Safety, and Nutrition in Early Childhood Education

An introduction to the health and safety of young children in early childhood settings. Nutrition and policy on medication administration, infectious disease control, sick child care, universal precautions and liability, and record keeping are discussed. Students complete the Health and Safety training certifications required by N.H. child care licensing.

Positive Behavior Guidance and Supporting Young Children w/ Challenging Behaviors

By exploring theories of behavior management and functions in behavior, the role of positive behavioral supports in developing young children's social and emotional foundation is emphasized. Developmentally appropriate methods of guiding individual and group needs are shared as approaches to preventing disruptive behaviors in the classroom.

= You earn 9 credits in Early Childhood Education!

An NHTI ECE lab fee is assessed for all students in each course. Students will be expected to carry out 6 hours per week of observation and practice in a childcare setting. All 3 courses require students to complete and hand in assignments on Tuesdays, Thursdays, and Saturdays. Courses are hybrid (online during the week, with Zoom **attendance** on Saturdays). There is a 2-week break between each course.
