This training will award participants up to three (3) hours of professional development.

Fee: FREE

Pre-registration is required and is on [Eventbrite](#).

Let's Learn About Lice

Join Laurene Plourde for information on head lice that is backed up with scientific data and studies so you know you are getting the right information.

She will walk you through checking, detecting, treating, and preventing head lice.

Tick-Safe Strategies

The goal of this training is to teach individuals how to identify and adopt evidence-based tick-safe prevention strategies to enhance their health and safety and avoid disease. By the end of the session you will be able to identify: ticks that transmit pathogens in NH, explain where and when you would expect to find ticks in NH, describe how to manage outdoor spaces to make them less attractive to ticks, describe how to protect yourself from being bitten by a tick and describe how to check for ticks and what to do if you find an attached tick.
