Salem, OR

LUMBER QUALITY & PROCESS CONTROL

Invest in the future

There is no better investment you can make for the long-term health of your mill than to increase the quality and process control skills of your people.

These programs have earned the reputation for providing practical, mill-tested information that has been applied by producers to make millions of dollars in increased revenues. Most companies who send personnel to these training programs do so year after year. Managers look to them as effective tools for educating supervisors from all areas of the sawmill.

Who Should Attend

Quality Control Supervisors & Technicians
Production Supervisors
Filing & Maintenance Personnel
Process Control Technicians
Key Operators

Workshop Objectives

1. Insure that production and quality control is in balance so that both recovery and production increase.
2. Recognize and eliminate costly mistakes that rob a company of its maximum profitability.
3. Fine tune or improve an existing quality and process control program in all areas.
4. Maintain an effective lumber size-control program which may include real-time analysis.
5. Maintain an effective lumber drying program focused on reducing moisture variability and

What to Expect

There are several key activities that must be accomplished for a Lumber QC program to be successful: identifying key areas for improvement, leadership, problem solving, and finding long-term solutions to problems. Each of these activities support a QC program's basic goal of meeting customer requirements while maximizing the value, recovery, and lumber production. Attendees will have an opportunity to work with topics and others that will increase employee effectiveness.

MONDAY, APRIL 25

8:00 Quality Essentials

Identify the critical areas for Q.C. success.

Terry Brown

9:00 A \$100,000+ Opportunity

This visual tour from woods to shipping will show how your mill can gain \$100,000+.

Terry Brown

11:45 Lunch

1:30 Dollar Impacts of Size Control

Learn how target size, kerf, sales price and grade recovery interact and relate to sawmill profitability.

Terry Brown

2:15 Present Ideas Effectively

Learn some simple techniques to use to communicate your ideas to your supervisor to have a better chance of getting them accepted

Terry Brown

3:00 Productivity & Motivation

Productivity and Motivation are key elements of profitability and job satisfaction. Here are some tools to help you be successful.

Terry Brown

4:30 Adjourn

TUESDAY, APRIL 26

8:00 Lumber Size Control

Understand the concepts of effective size control. Learn what sawing variation is, how it affects target size and how it can be used to monitor machine center performance. Also learn how to get the most value from your size control program.

Terry Brown

10:15 Size Control Systems

Learn about The LSIZE Program and SiCam RealTime, current real-time size control solutions available to the industry.

**Nick Barrett, President
SiCam Systems
Delta, BC**

11:45 Lunch

1:00 Lumber Drying Q.C.

Learn about some of the key factors that influence the success of Quality Assurance in lumber drying.

**Mark Gillis, Area Manager
SPIB
Sturgis, MS**

3:00 Achieving Quality Results

Learn how Hood Industries achieves results at their Metcalfe Mill.

**Chad Smith, Manager
Hood Industries
Metcalfe, GA**

4:30 Present Certificates & Adjourn

LUMBER QUALITY LEADERSHIP

Workshop Objectives

This workshop discusses more advanced quality-related topics; how to become a better leader of self and others; understand key business metrics, communications, and dealing with change effectively.

WEDNESDAY, APRIL 27

8:00 Personal Leadership

Learn about personal leadership and how it relates to leading others.

Terry Brown

9:45 Sawmill Business Metrics

Learn about some of the key metrics or measurements that interact to determine sawmill profitability.

Terry Brown
