

# OLDER ADULTS NEEDED FOR THE DEVELOPMENT OF A SOFT LOWER-EXTREMITY ASSISTIVE SUIT!

---

We are developing a soft, lower-extremity suit to improve walking in older adults who have decreased mobility. This research study will involve one or more visits during which you will be asked to assist with the design and development of this suit by providing information about the way you walk and testing the suit's components.

## **You are eligible if you:**

- Are between 65-90 years old
- Are in a generally healthy condition
- Have difficulty keeping up with the pace of younger family members and/or friends while walking
- Feel your health limits your ability, either a lot or a little, to walk several blocks or climb several sets of stairs
- Are able to walk independently (with an assistive device but no physical assistance) for at least 6 minutes
- Are not currently in a physical therapy program involving your lower extremities

***You will receive a \$50 Amazon Gift Card for each study visit you attend. Transportation costs may also be reimbursed.***
