Help Improve Work Zone Safety Across Ontario
Your Experience Matters

The Civil Engineering Sector Labour-Management Health and Safety Committee and IHSA are conducting a Traffic Intrusion Prevention Survey to better understand the frequency, causes and impacts of traffic intrusions in work zones across Ontario.

A traffic intrusion occurs when an unauthorized vehicle, pedestrian, cyclist, or other road user enters a designated traffic protection zone, work zone, buffer space, or closed area. Your experiences and insights will help identify trends, highlight risks, and inform practical solutions to improve worker safety across the industry.

Participate for a Chance to Win

As a thank you for your time and participation:
✅ Complete Part 1 of the survey and receive one entry into our prize draw.
✅ Complete Part 2 and receive an additional entry, increasing your chances of winning.

Your feedback will help support the development of future guidance, training, resources, and best practices to prevent traffic intrusions and improve work zone safety.

Why Your Feedback Matters

Your participation will help:

- Identify common causes and contributing factors of traffic intrusions
- Better understand current traffic control practices and challenges
- Support the development of new industry resources and guidance
- Enhance worker and public safety in and around work zones

Survey Details

Part 1: Industry experiences and organizational practices related to traffic intrusions
Part 2: Additional questions focused on specific intrusion events and prevention opportunities
Time Required: Approximately 10-15 minutes

Please submit all responses by January 15, 2027

Complete the Survey

Thank you for taking the time to share your experience and expertise.

Together, we can help improve traffic intrusion prevention and make work zones safer for workers, employers, and the public across Ontario

Sincerely,

The Civil Engineering Sector Labour-Management Health and Safety Committee
Infrastructure Health and Safety Association (IHSA)
