Request for Participation

Working Group: Below-Grade Waterproofing

The Infrastructure Health and Safety Association (IHSA) and Ministry of Labour, Immigration, Training and Skills Development (MLITSD) are seeking members to join a Working Group (WG) to assist in developing a best practice guideline on below-grade waterproofing, specifically in the residential sector.

The waterproofing industry frequently encounters challenging situations where waterproofing activities are necessary. Through this working group, we will examine these scenarios and develop best practice guidelines to help ensure worker safety.

The WG is scheduled to convene in the fall of 2024, comprising industry experts, engineers, manufacturers, and representatives from the MLITSD.

If you're interested in joining this working group, kindly inform Jennifer McKenzie via **email**. Please use the subject line "**Waterproofing WG**." Within the email's main text, share your relevant work experience and technical expertise concerning below-grade waterproofing activities.

Individuals will be selected based on their relevant work experience and technical expertise indicated in the expression of interest email received.

Those selected will receive notifications regarding the introductory meeting's precise date, time, and location.

Please submit your interest to participate no later than**September 9, 2024**.

Thank you for your continued contributions and support.

Click here to express your interest

Sincerely,

Jennifer McKenzie
