Nonprofit Funds

ENDOWMENTS AND THE COMMUNITY FOUNDATION

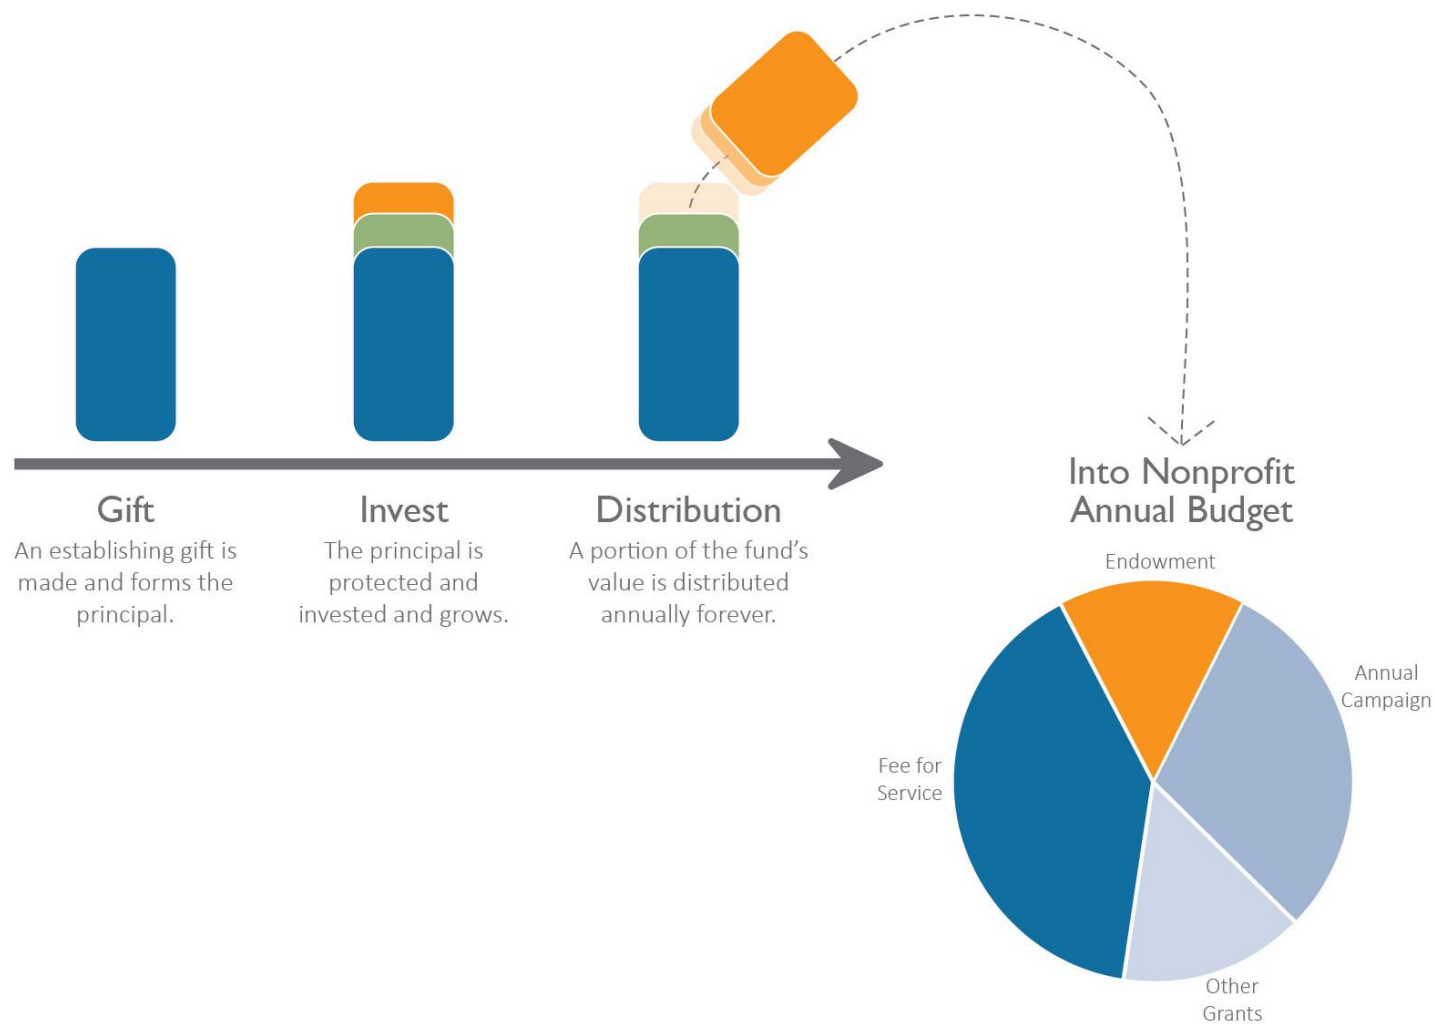

ARTHUR KIM
Development Officer

What is an Endowment?

- An endowed fund is a permanent fund that is established by a donor to help ensure the long-term sustainability of nonprofit organizations by providing a permanent source of support.
- At community foundations endowed funds are pooled and invested to achieve long-term growth by balancing principal protection with distributions. Contributions to endowed funds at qualified community foundations may be eligible for Endow Iowa tax credits.

How an Endowment Fund Works

Power of the Endowment

Assume an endowment fund earns a net total return averaging 7% annually and has a payout policy allowing a 4.5% distribution.

Types of Funds

ENDOWED FUND

An endowed fund is a permanent fund that is established by a donor to help ensure the long-term sustainability of nonprofit organizations by providing a permanent source of support. Endowed funds are pooled and invested to achieve long-term growth by balancing principal protection with distributions. Contributions to endowed funds may be eligible for Endow Iowa tax credits.

NON-ENDOWED FUND

Unlike endowed funds, a non-endowed fund does not operate in perpetuity. This means the assets generated by these gifts are not permanent nor invested. The principal balance is immediately available for grant distribution. A non-endowed fund can become an endowed fund at any time upon request. Contributions to non-endowed funds are not eligible for Endow Iowa tax credits.

QUASI-ENDOWED FUND

A quasi-endowed fund offers flexibility while still being exposed to the stock markets for investment purposes. Quasi-endowed funds are a good option for donors with a goal to distribute the funds within a 3-10 year time horizon. A quasi-endowed fund can become an endowed fund at any time upon request. Contributions to these funds are not eligible for Endow Iowa tax credits.
