

Cross-Systems Collaboration: Supporting Mandated Clients

NYS Social Work & LMHC CE Contact Hours: 2.0

CASAC Renewal Credit Hours: 2.0

This 2-hour training provides an overview of diversion and community supervision and the role that behavioral health providers can play in supporting clients who are mandated to treatment by the court, or as a condition of probation or parole. Whether mandated by court through diversion or as a condition of probation or parole, behavioral health providers must learn to collaborate with these systems and play a role in monitoring and reporting clients' progress. Through interactive and didactic training approaches, trainees will learn strategies and best practices for working with mandated clients and collaborating with the systems that oversee their treatment progress.
