

Destin8 Release Notes - Version 6.3.0

Change Requests

DES-8891 – INQ – Include Release Note Date/Time in CSV – The INQ01 CSV reports will now include the Release Note date and time.

DES-9519 – VNQ – Add Context menu to UVI overview screen (VNQ02) – This change allows users to navigate directly to enquiry functions from the UVI overview. This negates the need to first view the Voyage detail screen.

DES-9802 – PNQ – Enable search for purged records by GMR – PNQ now gives the ability to search historic records by GMR.

DES-9850 – REP – Allow Triple Click Select – Quality of life function introduced to select full report body using triple click.

DES-9904 – Menu – New Tracker Sub-menu – Tracking based functions given dedicated sub-menu to separate these from other Miscellaneous functions.

Improvements

DES-9811

Destin8 is getting a new look.

We've been making changes to the look and feel of Destin8. 6.3.0 introduces a clean modern interface, designed to enhance your Destin8 experience while keeping everything you rely on.

Modern look & feel - A more intuitive interface, making it easier to find what you're looking for.

More space, more focus - The streamlined side menu reduces clutter on-screen, giving you more room to work and view Destin8 content.

What About Destin8 Transactions?

Destin8 functionality - Transactions remain unchanged - you'll still have access to the same transactions and features you use every day.

No impact on your data - As always, your data remains safe and secure

Support is here for you - Our knowledge base is rich with user guides, troubleshooting tips and how-to articles, and as always our helpdesk team are here to help you.

This release contains a total of 32 Improvements, Change Requests, Bug Fixes, and Security Changes, some of which may not be specified as they are directly related to the Destin8 infrastructure or do not impact externally at the time of implementation.
