

Destin8 Release Notes - Version 6.14.0

Change Requests

ENS only CUSCAR facilitation

In response to feedback received from our users we have made some changes to the way ENS can be submitted by EDIFACT messaging. EDIFACT users will now be able to send ENS declarations by CUSCAR without the associated inventory records. This allows our users to submit multiple ENS declarations independently of the manifest.

DES-10431 – INQ – CSV Output to include UKBF Holds – Change to include the UKBF hold type within the INQ CSV output.

Bugs

DES-10364 – Split Screen – Fixed an issue where pop-up screens, when opened within a split screen window, were not adjusting the width of the new window and were falling outside of the viewable area.

This release contains a total of 32 Improvements, Change Requests, Bug Fixes, and Security Changes.

Some changes are not listed here as they pertain to:

- Internal infrastructure enhancements.
- BETA test functionality.
- Preparatory work for upcoming features.
- Government body-specific functionality.
- Non-user-facing updates.
