Destin8 Release Notes - Version 6.4.0

Change Requests

DES-9467 / DES-9661 / DES-9662 – PNQ – Store and display ENS MRN – Enhancements have been made to ensure that purged import records retain their associated ENS MRN. This allows continued visibility of the MRN even after the record is no longer active.

DES-9822 – INQ/ENQ – Filter Working Ports – A quality-of-life improvement: when filtering Import and Export queries by port, users will now only see ports directly associated with their badge code.

DES-9503 – ENQ – Multiple Working Port Search – Users can now select multiple working ports when performing voyage-based searches in ENQ

DES-9603 – VAM – Allow ICS Date amendments – Allowing the amendment of the ICS date after initial voyage registration.

This release contains a total of 38 Improvements, Change Requests, Bug Fixes, and Security Changes.

Some changes are not listed here as they pertain to:

- Internal infrastructure enhancements
- Preparatory work for upcoming features
- Government body-specific functionality
- Non-user-facing updates
