

# DIGITAL ECONOMY ECOSYSTEMS

**A pilot project by the SC Office of Rural Health and SC Rural Innovation Network, with funding from the US Department of Agriculture.**

- Barnwell County
- Williamsburg County

## What is a Digital Economy Ecosystem?

A Digital Economy Ecosystem will feature technical education, job training, leadership development and community planning to bring quality digital jobs, local entrepreneurship, and remote work opportunities to rural communities.

**Step 1-** Community leadership training in broadband technology and its applications, provided by Revolution D.

**Step 2-** Rural communities will develop a rural innovation roadmap for a digital economy, facilitated by SCRIN.

**Step 3-** Communities launch their plans for a sustainable Digital Economy Ecosystem in which digital literacy increases, entrepreneurs are empowered and the local economy is revitalized.
