

Hi, we are Kenny and Tasha. We have been Foster parents for 9 years. We have 3 biological daughters Savanna (23), Kenda (20), and Autumn (13). We are expecting our first granddaughter in July, we are super excited about this! We have been Foster Parents to approximately 20 plus children. We currently have 2 placements, in which one we are in the process of our 1st adoption!

Being Foster parents comes with challenges for sure. Since we have fostered babies to teens, we have had our share of different challenges. From being up all night with babies to being up all night looking for that teen that did not come home. Although different types of worry and stress comes from those situations, the reward is so much greater. It is so rewarding knowing that you can make such a lasting impression and all of these kids' lives, no matter the age. Seeing them take their first steps or landing that first job. We are able to share the love that God has given to us. These kids also make such an impression in our lives! They are able to show us how capable of love, compassion, and empathy that we can share.

Enjoy the time that you have with these kiddos! Smile and laugh often. ♥
