

## Tech Time November, 2016

Welcome back to another edition of Tech Time! To begin, I hope you and your family had a super Thanksgiving holiday! During this wonderful month of November, the students have continued to eagerly participate in the use of the lab's 3-D printer. This impressive participation took place during the 'student choice' portion of computer class. To view all of the 3-D printer projects, I invite you to please use this [link](#) and enjoy!

During the upcoming month of December, the 'student choice' portion of computer class will focus on learning how to create a Web page. Using HTML (HyperText Markup Language) and the app Google Sites, students will be making Web pages that focus on computer history! Another exciting event that is taking place in December, involves the Goshen Friends School's participation in the *Hour of Code*. This worldwide event is being billed as the largest learning event in history! During the week of December 5-11, Computer Science in Education week, the second grade, during their computer class on the 9th, will be taking part in this historic event! I will be teaching the students how to use code to create the famous pong game that was popular back in the 1970s. For more information regarding this event please click [here](#).

Until the December edition of Tech Time, have a Happy Thanksgiving and a happy computer experience to boot!

In friendship,

Teacher Scott
