

LiDAR Webinar

Wednesday, June 5, 2024

2:00 pm CDT

Assiniboine River Basin Initiative (ARBI) is hosting an introductory webinar on LiDAR - what it is, how it can be used and future applications - to assist those on the landscape incorporating it into their “tool boxes”.

What is LiDAR?

LiDAR, an acronym for “light detection and ranging,” a remote-sensing technology that uses laser beams to measure precise distances and movement in an environment, in real time.

The hour and half workshop will cover the basics of LiDAR and how it can be applied in various planning scenarios across the landscape, including:

- How is it capture at various scales,
- Key applications,
- Flood hazard mapping,
- Retention storage identification and sizing,
- Emerging Applications: buildings, ditches, culverts, etc.
