

Integrative and Functional Medicine Approach to Basic and Advanced Laboratory Interpretation

CLINICIAN'S DESK REFERENCE

Dr. Wayne L. Sodano

DC, DABCI, DACBN, BCTN

Review
Reference

Table of Contents

Chapter One: Introduction to Clinical Laboratory Medicine

Introduction to Laboratory Medicine

Rationale for Obtaining Laboratory Blood Studies

The “Reference Range”: Problem and Biologic Variation (See Appendix 2: Adult Critical Laboratory Values)

‘Optimal’ Reference Range

FALTS: Factors Affecting Laboratory Tests (also see Appendix 1)

The Most Common Sources of Pre-analytical Variability

Biotin (vitamin B₇) Laboratory Test Interference

Stages of Hydration Assessment

Biological Rhythms

Circadian Rhythms in Selected Analytes

Pertinent Laboratory Definitions

Glossary of ‘Omics’

Laboratory Assay, Instrumentation and Technology

Common Laboratory Assay Tests

In-Office Laboratory Testing (Physician Office Labs - POLs)

Chapter Two: Hematology

Blood Composition and Life Span of Blood Cells

Development of Blood Cells

Hemoglobin Synthesis: the role of specific nutrients in hematopoiesis

Vitamins, Minerals and Amino Acids

Hypercobalaminemia

- The Complete Blood Count
- Red Blood Cell Count (Erythrocyte Count)

- Hemoglobin (HgB, Hb)
- Hematocrit
- RBC Indices: MCV, MCHC, and MCH (and RDW)
- Reticulocyte Count and Reticulocyte Production Index
- Peripheral Blood Smear/Evaluation of Cell Morphology
- Classification of Anemia According to RBC Indices
- White Blood Cell (Leukocyte) Count, Differential and Absolute Count
- Neutrophil-to-Lymphocyte Ratio
- Platelet (Thrombocyte) Count and Mean Platelet Volume
- Medications/Substances Commonly Associated with Drug-Induced Thrombocytopenia
- Mean Platelet Volume
- Coagulation Tests
- Tests of Vascular Platelet Phase of Hemostasis
- Anti-Blood Clotting Foods and Supplements

Chapter Three: Liver, Gallbladder and Pancreas

Serum Proteins – Liver/Gallbladder Tests

Serum protein electrophoresis

Major Serum Proteins

Globulin Subfractions

Patterns Acute-Reactant Proteins Found on SPE & Associated Conditions/Disorders

Serum Protein Electrophoresis Patterns Disease: Biochemical Biopsy Observations

Total Serum Protein, Albumin, Globulin, and A/G Ratio

Excretion into the Bile Duct: Gamma-Glutamyl Transpeptidase (and GGT association with iron analytes), Bilirubin (total, direct, and indirect), Alkaline Phosphatase, and 5' – Nucleotidase

Hepatocellular Injury: Aspartate Aminotransferase (AST) and Alanine Amino Transferase (ALT)

Guide for Interpreting Liver Enzymes

Isolated Abnormalities in Liver Test Results

Interpretation of Liver Enzyme Tests: A Rapid Guide

Pancreatic Enzymes: Serum Amylase and Serum Lipase

Amylase

Lipase

Lactic Dehydrogenase (LD) and Isoenzymes

Isoenzyme Patterns in Selected Disease Conditions

Percentage of Activity of LD Isoenzymes in Tissue

Chapter Four: Electrolytes, Minerals, and Acid-Base

Electrolytes and Serum Anion Gap

Normal Volume of Body Fluid Distribution

Electrolyte Concentrations in Extracellular and Intracellular Fluids

Sodium

Potassium

Chloride

Carbon Dioxide

Anion Gap

Serum Calcium, Serum Phosphorous, Serum Magnesium, and RBC Magnesium

Calcium

Phosphorous

Magnesium

Acid-Base and Acid-Base Disorders: Bicarbonate and CO₂ Buffer System

Chapter Five: Infectious Disease, Rheumatic Diseases, and Serum Uric Acid

Brief Review of Clinical Microbiology

Viral Infections

Bacteriology

Body Sites with Normal Colonizing Bacterial Flora

Common Pathogens by Site of Infection

Lyme Disease Testing

Fungi – Mycotic Diseases
Categorization of Selected Medically Important Fungi
Mycobacteria
Parasitology
Brief Overview of Parasitic Infections
Rheumatic Diseases
Systemic Rheumatic Disease and Related Disorders
Laboratory Assessment Test for Rheumatic Disease
Serum Uric Acid

Chapter Six: Tumor Markers (also see Appendix 7)

Overview of Tumor Markers and Elevation in Enzymes That May Indicate an Active Tumor Process
Serum Tumor Markers in Clinical Practice
Tumor Markers Found on/in Tumor Cells in Clinical Use

Chapter Seven: Pulmonary Function Testing (Spirometry in Primary Care), Pulse Oximetry

Pulmonary Function Testing (PFT)
Spirometry at a Glance
Indications for Ordering a Spirometry Test
Contraindications to Using Spirometry
Spirometry Terminology
Sample Test Results for Obstructive and Restrictive Disease
Interpreting Spirometry Results
Oximetry (Pulse Oximetry/Oxygen Saturation)

Chapter Eight: Cardiac and Vascular Health

Cardiovascular Disease Risk Assessment
Major Coronary Artery Disease Risk Factors

Lipoproteins and Cardiovascular Risk
Triglycerides
Lipoprotein Subfractions
LDL-P Particle Number
LDL-P Particle Size
LDL Subclasses and Patterns
High-Sensitivity C-Reactive Protein
Lipoprotein-associated phospholipase A2
Homocysteine
Fibrinogen
Vitamin D
Vitamin K
Testosterone
Heart Failure Analytes (soluble ST2 and NT-BNP)
Insulin
Galectin-3
Genetic Cardiovascular Disease Risk Markers
Additional Markers of CVD Risk
Noninvasive Cardiac Imaging and other Cardiovascular Tests
Contributing Factors of CVD
CVD Assessment

**Chapter Nine: Integrative and Functional Medicine Perspective on Basic Laboratory Test Interpretation:
Patterns of Dysfunction**

Introduction
Conditions and Associated Patterns of Change (also see Appendix 4)

Chapter Ten: Clinical Laboratory Medicine Approach to Anemia

Clinical Approach to Anemia

Laboratory Tests Used to Diagnosis Anemia
Red Blood Cell Production
Suppression of Erythropoiesis Caused by Inflammation
Conditions Associated with a Reduced Erythropoietin Response
Hepcidin
Hemoglobin
The Diagnosis of Anemia
State of Anemia: Associated Conditions
Anemia Caused by Bone Marrow Damage
Causes of Marrow-Damage Anemias
Drugs Associated with Marrow Damage
Hemoglobinopathies
Thalassemia Syndromes
Hemoglobinopathy Diagnostic Algorithm
Erythropoietic Profile of Thalassemia
Concerns About Thalassemia
Erythropoietic Profile of Hemoglobinopathy
Chronic Blood Loss Anemia and Hemolytic Anemia
Overview of Hemolytic Anemias
Chronic Hemolytic Anemia Erythropoietic Profile
Macrocytic Anemia
Testing for Vitamin B₁₂ and Folic Acid Deficiency
Iron Deficiency Anemia, Impact of Iron Deficiency on Thyroid Hormone Synthesis and the Anemia of Chronic Disease
The Effect of Iron Deficiency on Thyroid Function
Biomarkers of Iron Deficiency
Iron Panel Interpretation at a Glance
Anemia Profile Algorithm

Reference Preview

Chapter Eleven: Laboratory Evaluation of Blood Glucose, Insulin Resistance and the Insulin Resistance Continuum

Glucose Metabolism and Regulation

Effects of Primary Glucoregulatory Hormones

Absolute Risk of Mild-to Moderate Hypoglycemia w/Commonly Used Glucose-Lowering Agents

Non—Diabetic Drugs Associated with Hypoglycemia

Select Drug Categories and Drugs Associated with Hyperglycemia

Signs and Symptoms of Hypoglycemia

Signs and Symptoms of Hyperglycemia

Laboratory Evaluation of Metabolic Syndrome, Insulin Resistance and Diabetes

Additional Tests, Markers and Calculations for Determining the Metabolic Syndrome, Insulin Resistance, and Diabetes

Three Stages of Progression from Insulin Resistance to Diabetes

Diabetes-Related Autoantibody Testing

Progression to Type II Diabetes

Quick Comparison of Fasting Glucose and Fasting Insulin

Approximate Comparison of Blood Glucose, Fructosamine, and HbA1c

Chapter Twelve: Parathyroid Glands, Serum Calcium and Vitamin D

The Physiological Effects of PTH

Control of Parathyroid Hormone Secretion

Hypoparathyroidism

Physical Exam Testing for Hypocalcemia

Lab Testing for Hypoparathyroidism

Hyperparathyroidism

PTH and Serum Calcium Nomogram (also see Appendix 11)

Drug Induced PTH Changes

Parathyroid Treatment Considerations

Vitamin D

Activation of Vitamin D
Synthesis of 1, 25-dihydroxycholecalciferol (the active form of vitamin D)
Vitamin D: Mechanism of Action
Tissues and Cells that Produce 1, 25 (OH)2 D and/or Carry the VDR
Physiological Function of Vitamin D
Absorption and Excretion of Vitamin D
Vitamin D Deficiency: Signs and Symptoms
Conditions That May Respond to Vitamin D Therapy
Vitamin D Status Assessment
Serum 25(OH) D Reliability
Optimizing Vitamin D Level
Vitamin D Deficiency Markers
25-Hydroxyvitamin D Recommended Levels in Serum
Pharmacokinetics of vitamin D toxicity (Abstract)
Vitamin D and Drug Interactions
Vitamin D and Autoimmunity
1,25(OH)2D and Inflammatory Disease
Inflammation and the Infection Connection: vitamin D (Abstract)
Proposed Optimal Ranges for 25(OH)D and 1, 25(OH)2 D
GGT, Iron and Bone Health

Chapter Thirteen: Thyroid Function Laboratory Analysis

Introduction
Effect of Adrenal Stress on Thyroid Function
Diurnal Variation of Thyroid Function Tests
Reference Values of Thyroid Function Lab Testing
Trimester-Specific Reference Intervals for TSH
Sample Functional Medicine Lab Test Results
General Interpretation of Thyroid Function Laboratory Tests

General Interpretation of Thyroid Function Laboratory Tests: A Second Look
Conditions Associated with an Altered FT₄-to-FT₃ Ratio
FT₄-FT₃ Ratio Scale
Integrative Medicine Thyroid Scale for Interpreting Thyroid Function Lab Tests
Thyroid Scale Functional Medicine Interpretive Matrix
Challenges of Thyroid Hormone Replacement and Thyroid Function Laboratory Test Interpretation

Chapter Fourteen: Erythrocyte and Plasma Fatty Acid Testing

Erythrocyte Cell Membrane Fatty Acids Composition and Plasma Fatty Acids
Signs and Symptoms of Essential Fatty Acid Deficiency
Fatty Acids Profile Testing Options
Omega-3 Index
Interpretation of Fatty Acid Profiles: Clinically Relevant Patterns
Fatty Acid Imbalances Commonly Associated by FA Profiles
Metabolic and Genetic Disturbances Evaluated by Fatty Acid Profiles

Chapter Fifteen: Laboratory Interpretation of Organic Acid Testing and Clinical Implications

Introduction
Common Clinical Laboratory and Patient Assessment Indications for Ordering a Urinary Organic Acid Test
Mitochondrial Functional Assessment
Nutritional Markers
Neurotransmitter Metabolism Markers (Metabolites)
DNA Damage, Detoxification and Intestinal Dysbiosis Markers

Chapter Sixteen Integrative and Functional Medicine Stool Analysis Assessment

The Fecal Immunochemical Test
Cologuard Test
Review of Intestinal Permeability/Barrier
In Vivo Functional Tests and Bacteria-Related Tests for Assessment of Intestinal Permeability

In Vivo Biomarkers and Histological Assessment of Intestinal Permeability

Intestinal Permeability Test (LMT) and Interpretive Guide

Hydrogen (H₂) and Methane (CH₄) Breath Tests

SIBO Breath Test

Specific Indicators to Suspect the Presence of SIBO

Urinary Markers of Bacterial and Yeast Overgrowth

D-Lactate

Integrative and Functional Medicine Comprehensive Stool Analysis

Clinical Microbiology: Bacteriology and Mycology; Parasitology; Digestive and Absorption Markers;

Immunology/Inflammation Markers; Metabolic Markers

Parasitology

General Considerations for Abnormal GI Microbiology

Chapter Seventeen: Routine Urinalysis and Renal Function Testing

Anatomy & Physiology of the Kidney and Urinary System

Kidney Function Analyte Explanation and Interpretation

Urine Studies: Type of Specimens and Collection

Macroscopic Analysis

Urine Odor

Urine Volume

Microscopic Analysis

Biochemical Analysis (Semiqualitative testing)

Proteinuria

Hematuria

Bilirubin

Urobilinogen

Kidney Stones

Urinary Tract Infections: Integrative Therapy Considerations

Alkaline Way Approach to Healing: Urine pH Testing

Chapter Eighteen: Neurodegeneration: Integrative Medicine Approach to Early Detection

Introduction

Generation of Nerve Cells in the Adult Brain

Pathophysiology of Neuron Damage, Degeneration and Loss

Non-Genomic Risk Factors and Associations of Neuronal Damage and Loss

- Altered Gastrointestinal Microbiome and Gastrointestinal Barrier
- Microbial Pathogens: Identifying and Treatment
- Physiological Role of Amyloid- β
- Stress and Sleep Disturbance
- Mitochondrial Dysfunction and Oxidative Stress
- Blood Glucose Dysregulation
- Neuroinflammation
- Blood-Brain Barrier Dysfunction
- Thyroid Dysfunction
- The Role of Environmental Contaminants in Neurodegenerative Disease
- Food Reactivity
- DNA Methylation
- Ubiquitin Pathways
- Daily Blue-light Exposure
- Brain-Derived Neurotropic Factor and its Clinical Implications

Evaluation and Diagnostic Laboratory Test Considerations for Cognitive Decline

Evaluating Suspected Dementia from an Integrative Medicine Perspective

Laboratory Evaluation of Integrative Medicine Assessment of Genomic and Non-Genomic Contributing Factors to the Onset of Dementia

The Role of Epigenetics in Neurodegenerative Diseases and the Role of Nutriepigenomics

Recommended Prevention Strategies and Treatment Intervention Consideration

Appendix

Appendix 1: Factors Affecting Laboratory Tests (FALTs)

Appendix 2: Adult Critical Laboratory Values

Appendix 3: Botanical/Supplement FALTs

Appendix 4: Functional Medicine Blood Chemistry: Clinically Relevant Patterns

Appendix 5: Organ/Disease Panels

Appendix 6: AMA Designated Disease/Organ Panels

Appendix 7: Tumor Markers

Appendix 8: Cardiovascular Disease, Diabetic Risk and Inflammatory Markers

Appendix 9: Evaluation of Elevated Bilirubin

Appendix 10: Liver Enzymes: Rapid Interpretation

Appendix 11: Parathyroid Hormone – Serum Calcium Nomogram (see Chapter 12)
