

SIMpull™ TRUCK

WE LISTENED:

Maneuvering large, heavy reels around job sites can be nearly impossible. Uneven terrain and weight of the reels require a considerable amount of time and labor costs on jobsites that often have tight schedules and budgets.

SOLUTION:

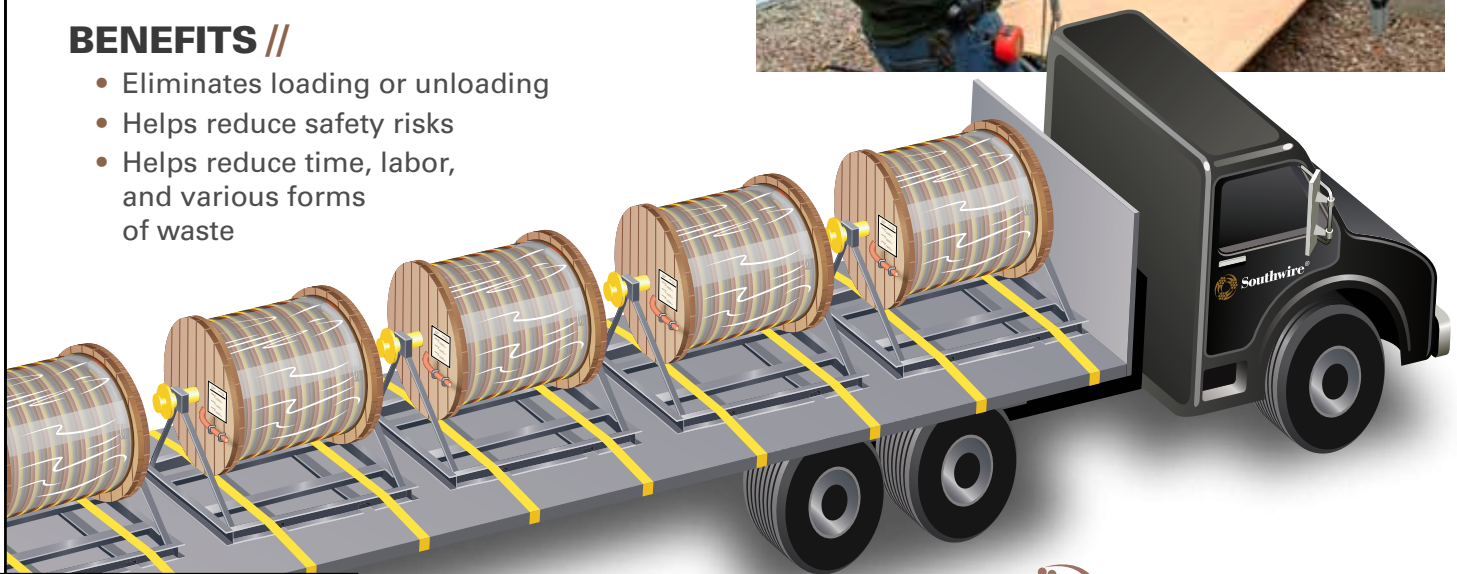

With the SIMpull™ Truck, contractors are able to pull wire directly from the truck. Contractors can expect increased savings on total installation costs, elimination of potential injury from reel handling, and decreased time required at each job site. Material arrives at the job site on reels that are loaded on A-frames. Southwire offers A-frames in two different sizes (4 ft. x 4 ft. and 6 ft. x 6 ft.), both of which can hold up to 6,000 pounds of wire. The SIMpull™ Truck is a smart way to cut installation time drastically and increase efficiency and safety on the job site.

FEATURES //

- No reel disposal fee
- Reusable reel payoff system
- Multiple payoff direction options to accommodate unique jobsite setups

BENEFITS //

- Eliminates loading or unloading
- Helps reduce safety risks
- Helps reduce time, labor, and various forms of waste
