

How to Enter Items by Product Number

If you have a large list of items to order, you will love how quickly you can enter the items by product number!

To begin, click **ENTER ITEMS**.

After selecting your Customer, your cursor is automatically positioned in the Product Number field, so you can just start typing the number of your first product! The quantity always defaults to 1...and the price always defaults to the CURRENT campaign. And notice the inventory status that displays directly under the product number field.

How to Enter Items by Product Number

You can adjust the quantity if necessary – your cursor is already positioned in the quantity field...just type the number you need. You can view pricing in the other available campaigns when you click the Price dropdown arrow.

Time Saving Tip

If you want to add products to the *same* Customer, you don't need to click the Customer menu because the Customer stays selected. When the item is in stock, the price in the current campaign is the best price, and you only need a quantity of 1, simply press the ENTER (or RETURN key) on your keyboard.

One unit at the current campaign's price is added to the order. This is so much faster than moving your mouse to the ADD TO ORDER button and clicking.

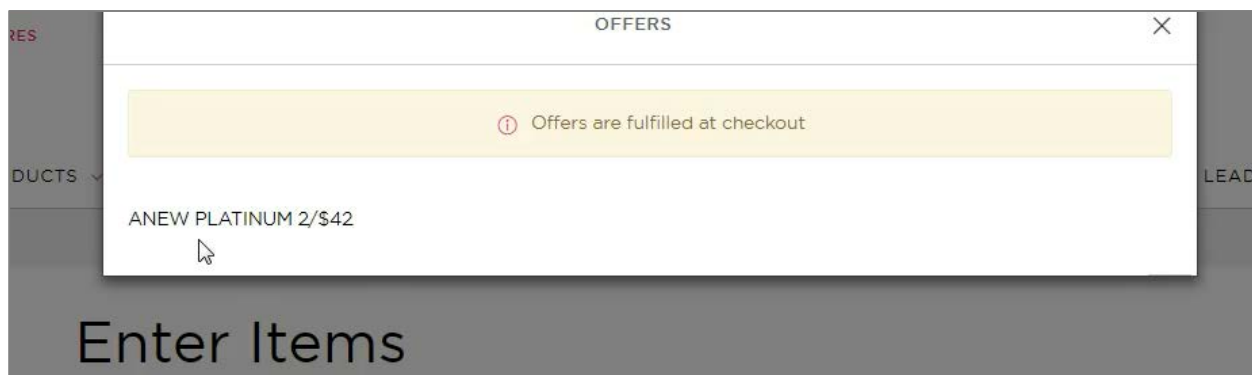

Special Offers

If a product has SPECIAL OFFERS, a link for Special Offers displays under the price.

The screenshot shows the 'Enter Items' form with the following fields: 'Select a Customer' (Sally Smith), 'Product Number' (064-110), 'Quantity' (1), and 'Price' (C16 - \$38). A 'Special Offers' link is visible under the price field, circled in red. Below the form are two buttons: 'ADD TO NEXT CAMPAIGN' and 'ADD TO ORDER'.

When you click the link, you'll see details about the offer. For example, buy 2 for \$42. Be sure to notice that the message also says that OFFERS ARE FULFILLED AT CHECKOUT.

The screenshot shows the 'OFFERS' modal window with a yellow message box that says 'Offers are fulfilled at checkout'. Below the message box, the text 'ANEW PLATINUM 2/\$42' is visible. The modal window is overlaid on the 'Enter Items' form.

In our example, notice that the Customer's item list is showing \$38 each, not the special offer of 2 for \$42. Remember, special offers pricing is fulfilled at checkout, not here.

	Senses HndGel PomMango 273-303 Campaign 17	\$3.49 \$5.00	1
	Ultra Sexy Pnk Spry 944-051 Campaign 17	\$18.00 \$25.00	1
