SD Fixit Clinic in Chula Vista

RSVP

Sat, May 30, 11am - 2pm PDT

Loma Verde Community Center
Chula Vista CA, United States

We've become too accustomed to the throw-away lifestyle. If something breaks, we toss it out and buy a new one. This behavior is filling our landfills at an alarming rate, and electronic waste is now one of the biggest sources of pollution. So why not learn how to fix things instead?!

Bring your broken, non-working items—electronics, appliances, computers, toys, bicycles, clothes, and more—for assessment, disassembly, and possible repair. We'll provide workspace, specialty tools, and guidance to help you take apart and troubleshoot your item. Even if we can't fix it, you'll learn more about how it was made and works.

This event is fun for the whole family, so bring your kids! We are expanding rapidly and will host events all over San Diego County.

We hope to see you there!
