

# Cloud Quest

Curriculum from Science Action Club covers clouds, climate and weather and

how youth can participate as citizen scientists to track them all! This nature unit is designed to spark curiosity and wonder, build scientific skills, and help youth develop STEM identities.

This unit includes:

- One guidebook with detailed plans for 12 nature investigations and citizen science experiences.
- One teaching kit with high quality science tools and supplies for 20 youth. (usually \$600, free to participating programs who complete all of the requirements)
- One interactive online training.
- One half-day face-to-face workshop.
- Digital access to the SAC Educator Portal.
- Ongoing support from a SAC trainer.

Please fill out the application at the link to the right. This is an important step and will further inform you as to the content.

Tuesday, September 5th
