

Tomas Gregorio
Chief Innovation and Technology Officer at University Hospital

Tom Gregorio is the Senior Vice President of the Healthcare Division at the New Jersey Innovation Institute. He leads the Healthcare Systems iLab and its For Profit commercialization company Healthcare Innovation Solutions (HCIS), which works with NJIT's research and development team and industry partners to establish and build healthcare-based solutions.

He has over 20 years of healthcare experience, most recently as Senior Vice President and COO of HEALTHEC (formerly IGI Health). Tom has been an active part of various senior management teams, including leading a team as the CEO and President of 230 bed community hospital in NJ. He has experience managing hospitals operationally and technically to comply with state and federal regulations, rules of accrediting bodies, and licensing standards; managing labor contracts; and facilitating hospital ownership transitions. Tom gained these skills at various healthcare organizations around the state of New Jersey. He holds an M.B.A. in the management of technology from New Jersey Institute of Technology and a B.S. in organizational management from Nyack College.

Tom's goal is to work with healthcare systems, providers, and insurers to optimize their information systems, streamline delivery, and improve patients' experience. He also proposes new care models that adapt technologies to human behavior and vice versa, boosting productivity with strategic IT investment. Tom is committed to the delivery of quality and compassionate healthcare.
