COVID-19 MARKET GUIDELINES

We've worked closely with the City of Camarillo to ensure the market stays open and that it is as safe as we can make it! We ask that our customers do the same and follow these important guidelines.

Ventura County Public Health recommends that you cover your face with a bandanna, neck gaiter, or homemade mask when you are in public. DO NOT PURCHASE N95 or surgical masks — they are needed by healthcare professionals. As a courtesy to others, please wear your mask — properly (covering your nose and mouth) when shopping at the market.

Per City of Camarillo guidelines, designated entrances and exits are no longer mandatory. They will not require hand-sanitizing; but we will have hand sanitizer available for shoppers who request it. Social distancing is still mandatory.

We will continue to monitor the number of people shopping at the market. If the crowd is too large, we will limit the number of people shopping at any one time. We will have a safe, socially distant-compliant line outside the market. Get in, get out, and get home!

We will not have ANY artisan booths, non-profit space, or music at this time. They are considered non-essential and the City Council asked that they stay home. ALL food sold at the market will be pre-packaged and NOT available for consumption at the market.

We truly appreciate the City Council and the Camarillo community for supporting our local farmers and bakers as we all adjust to keeping the market open each Saturday and available as a vital resource to our community.

If you have any questions about the safety of shopping at the market — or have trouble finding your favorite vendor, please check in with our managers at the Market Office.

Please keep these CDC recommendations in mind:

- Wash your hands frequently (scrub for 20 seconds with soap and water).
- Use hand sanitizer when soap isn't available.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Keep several feet of distance from people.
- Cover your mouth and nose with a tissue when you cough or sneeze — or use the inside of your elbow. Toss the tissue and immediately wash your hands.
- Stay home if you are sick.
