

IMMUNIZATIONS ARE THEIR SUPER POWER AGAINST DISEASE

Winnebago County Public Health offers **FREE** routine immunization clinics for those 18 and under that qualify for the **Vaccines For Children Program**

CLINIC DETAILS

Routine Immunization clinics are the 2nd Tuesday of every month by appointment at our Oshkosh Location:

📍 112 Otter Avenue
Oshkosh, WI

📞 Call 920-232-3000 to schedule.

WHO QUALIFIES?

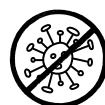

The Vaccines For Children Program provides childhood vaccines at no charge for those with:

- No Insurance
- Medical Assistance (includes BadgerCare)
- Native American or Native Alaskan Heritage

WHY IMMUNIZE?

Protect your family: immunizations give you the power to protect yourself and your family from getting sick.

Immunizations can prevent diseases such as measles, whooping cough, and influenza. These diseases can lead to hospital care and death.

Protect our community: Diseases like polio, diphtheria, and rubella are becoming rare due to immunizations. Until we eliminate disease, it's important to keep immunizing.

Immunizations are safe and they work! They've been around for over 200 years and scientists, doctors, and the FDA carefully review each vaccine to be sure they are safe.

SCHEDULE YOUR CHILD'S ROUTINE IMMUNIZATIONS TODAY!

Required immunizations for children in schools and childcare have changed as of May 2024.
Talk to your primary care provider to learn more or visit dhs.wisconsin.gov/immunization for more information.
