ALGAL BASED EDUCATOR TRAINING

What is the Summer Algae Science Institute (SASI)?

SASI is a professional development training that introduces educators to the Algae Foundation's K-12 Algae Academy curriculum. Trainings are available both in-person and virtually. Algae Academy is a FREE hands-on, algae-based STEM kit & curriculum (Elementary, Middle, and High School) that uses algae as the vehicle for exploration while helping students hone necessary STEM skills. Or as we like to say, Algae Academy takes algae from "Ick!" to "Awesome!"

After completing the SASI training, educators should feel fully confident in bringing the Algae Academy into their classroom and getting their students excited about the power of algae!

In-person at SFCC, June 16, 2023

Sign up for more info here!

SASI participants receive:

- Stipend for attendance
- I Love Algae T-shirt (the really soft kind)
- A complete walkthrough of the Algae Academy's 5 modules
- Algae Academy mini-kit to complete lab (virtual)
- Q&A with algae industry experts
- Guaranteed spot in 2023/2024 Algae Academy
