

VIRTUAL PREVENTION TRAINING

Protective Factors &
Logic Models

TRAINING DETAILS

Coalitions are more successful at reducing substance misuse over the long-term when their members possess a clear knowledge of the "big picture" of prevention and an understanding of the key elements and products of the Strategic Prevention Framework (SPF). This training focuses on enhancing participant knowledge required to describe the coalition's role in achieving community-level change and the skills to conduct a community assessment and develop effective logic models and comprehensive plans. Specific emphasis and examples will be how to integrate community-level protective factors.

DATE & TIME

October 17, 2022
3:00-4:30PM EST
