Youth Chronic Disease

What are the contents of the Youth Chronic Disease tab?

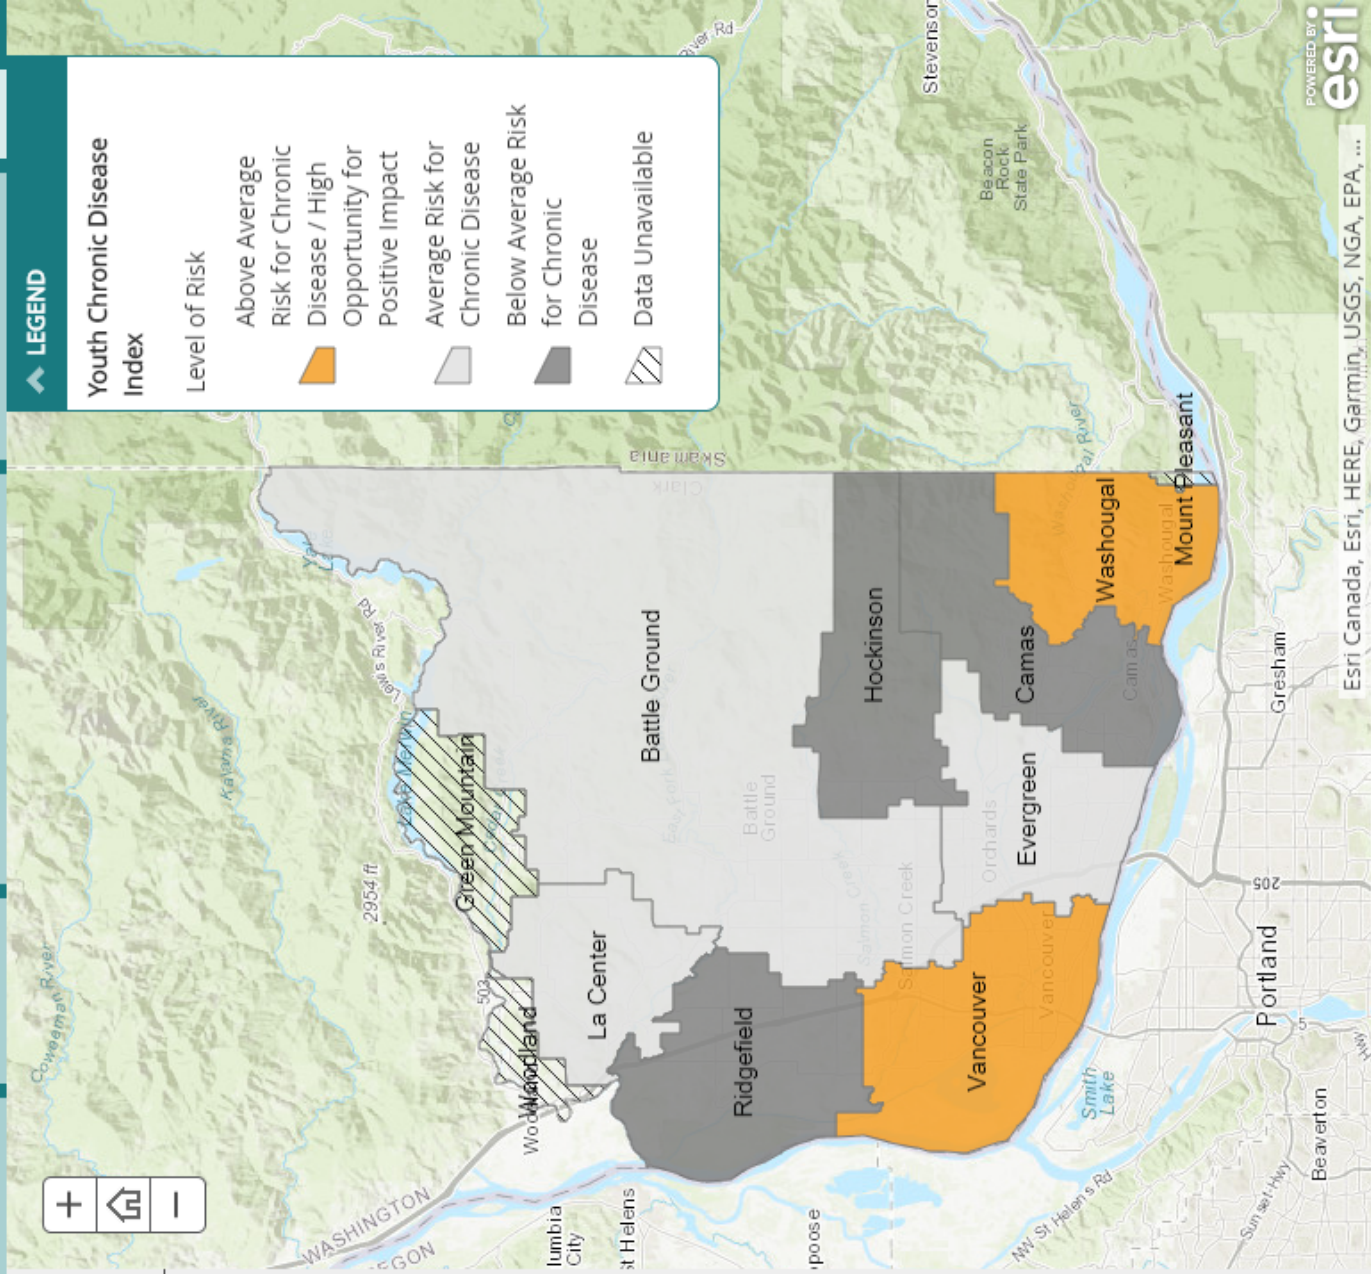

Each of the following youth chronic disease topics can be viewed individually on a map by scrolling through this panel, or by clicking on the following links. These data points are collected by the Healthy Youth Survey, which is administered to sixth-, eighth-, 10th- and 12th-graders in schools across Clark County every other year. This tab includes data collected from 10th-graders.

1. [Tobacco use](#)
2. [Eating fruits and vegetables](#)
