Lord Corporation, a wholly owned subsidiary of
Parker-Hannifin Corporation
Engineered Materials Group
Elastomer Process Materials Division
111 Lord Drive
Cary, North Carolina 27511

Date: April 9th, 2026
To: Valued Parker Customer

Dear Valued Customer,

Parker Lord remains committed to providing reliable product availability, consistent quality, and dependable delivery performance. However, we are experiencing sustained increases in material cost, energy, and freight across our supply chain. These increases are being driven by volatility in crude oil markets and downstream impacts to refining capacity and logistics, resulting in higher costs for key materials and transportation.

To continue meeting customer requirements and to support uninterrupted supply, Parker Lord will implement a **temporary surcharge**. This change applies to orders placed as of April 19th, 2026.

Your Parker Lord representative will confirm the amount of the surcharge applicable.

We appreciate your partnership and understanding as we navigate these input cost increases. Parker Lord remains focused on supporting your operations with dependable supply and responsive service. We will continue monitoring market conditions and will communicate updates as appropriate.

Sincerely,

Matt Peter
