

IMPORTANT ADVISORY

St. Thomas Traffic Signal Outage

SUMMARY:

The Department of Public Works (DPW) is advising the public of traffic signal outages at the following intersections in St. Thomas due to an electrical malfunction:

- Alton Adams Drive and William G. Lewis Lane, adjacent to Charlotte Amalie High School
- Veterans Drive and Forte Pladsen, adjacent to the U.S. Coast Guard Building

The Department is aware that the traffic signals at both locations are currently offline and is awaiting the necessary repairs.

Motorists are urged to exercise extreme caution when traveling through these intersections, remain alert, treat the intersections as four-way stops where appropriate, and yield to pedestrians using designated crosswalks.

DPW appreciates the community's patience and cooperation as we work to restore the traffic signals and continue improving road conditions throughout the territory.
