CHRISTIANSTED TOWN SEWER INFRASTRUCTURE CONSTRUCTION

(St. Croix, USVI) - The Virgin Islands Waste Management Authority (VIWMA) advises the community of repairs being performed in Christiansted, St. Croix in the vicinity of the King Christian hotel and along the boardwalk. This construction is part of the Authority's major sewer replacement program for the St. Croix district in the aftermath of the hurricanes in 2017. Approximately six miles of old corroded ductile iron, clay, and concrete pipes, will be replaced with SDR-35 PVC pipe. Additionally, 250 sanitary sewer manholes will be rehabilitated in Christiansted. This sewer rehabilitation in Christiansted will continue into December 2023.

These repairs will cause inconvenience to pedestrians and motorists who are advised to observe traffic control signs and detour.

The VIWMA staff and contractors apologizes for the inconvenience and thanks the community for their patience and cooperation.

This project, funded by the USEPA and FEMA, will improve the water quality of the Christiansted harbor.

Please call 844-WMA-USVI (844-962-8784) to report illegal dumping, sewage overflow or service interruption. For more information, contact the Division of Education and Communications Management at 340-513-4171 or email communications@viwma.org. Also, follow us on Facebook, LinkedIn and/or Twitter.
