TEAM REGISTRATION and CREATING YOUR ROSTER

Team registration will open the beginning of June.

As a result of the new system, team Managers will need to complete one additional task before they can complete the team's player roster. The Team will need to be registered in the new system. Once the system is live, team managers will receive a link to create their team in Sportlomo. There is no cost to register your team, but it is essential for our new system.

After your team is created, you will need to add each player to your roster. Please note, players must be entered into the Sportlomo system before they can be added to your team. You will need to have each player's details ready for entry.

1. First and last name of each player. (**needs to match what the player enters during registration**)
2. Date of Birth
3. The email address the player used to register.

If your players are not registered, you will not be able to add them. So, please make sure each player registers prior to June 1.

USASA will approve players within three business days of registering.
Question about registration should be directed to tournaments@usasa.com.
