

# ARMSTRONG THE LAW FIRM PC PRESENTS FRACGC®

The Texas Air Conditioning Contractors Association announces its new partnership with ARMSTRONG THE LAW FIRM P.C., which presents **FRACGC®**, the affordable legal solution for small to medium-sized heating/air conditioning businesses. The **FRACGC®** practice model was created in 2002, to specifically address the growing need of small business for quality legal counsel at an affordable cost. It allows business owners to consult with an attorney as needed, and encourages proactive use of outsourced general legal counsel as an adjunct to your management team.

By combining the skills of attorneys practicing in various areas, **FRACGC®** makes available the type of legal help you need, and does so for a level monthly payment that puts you in control of the amount of time spent on legal matters during the month. It allows preferred rates for both hourly assistance, and for flat fee matters such as wills or corporate set-up. For businesses electing the litigation plan, it provides preferred rates for litigation matters, should that be needed. **FRACGC®** removes the fear of cost from conferring with your attorney, and encourages you to do so proactively: before problems get out of hand.

Finally, **FRACGC®** affords HVAC businesses the ability to budget and forecast their legal costs — something that has traditionally been difficult or impossible for small businesses to do.

For TACCA members only, **FRACGC®** is surprisingly affordable at just \$199 per month for the entry level non-litigation plan. The litigation plan is only \$299 per month. And, if you know your legal needs are more robust, additional hours are available under both plans for \$399 - \$499 per month. This preferred pricing is available exclusively to TACCA members.
