

How 211 NE Warmline partners with Central Navigation & Community Collaboratives

Collaboratives and Central Navigation are deeply connected to their local community.

The Collaborative brings partners together to build relationships, align strategies, identify gaps, and strengthen prevention.

Central Navigation connects families to local support and gives providers real-time insight into what families are experiencing.

Together, they create a feedback loop:

Central Navigation is more than a referral, it is part of a larger community prevention infrastructure.

The goal

Together, Central Navigation and Community Collaboratives create a prevention system where families are welcomed, heard, and supported.

- Central Navigation does not replace community partners. It helps people reach them.
- Community Collaboratives do not duplicate services. They help align and strengthen them.

They help create a Nebraska where there is **no wrong door** for families seeking support.

How Central Navigation Supports a Statewide Warmline Partnership

As Nebraska works with 211 to develop a statewide warmline, Central Navigation helps connect statewide access with local follow-through.

211 provides a broad, statewide 24/7 access point for information, referral, and support. Central Navigation strengthens that pathway by connecting individuals and families to local prevention partners, warm handoffs, and community-based follow-up when additional support is needed.

Together, 211 and Central Navigation help ensure Nebraskans are not only given information, but are also connected to people and systems that can help them take the next step.

SUPPORTIVE COMMUNITIES • THRIVING FAMILIES

Bring Up Nebraska is administered by Nebraska Children and Families Foundation.
