

SUSTAINABILITY SAVES

Ready to make a positive impact on the planet?

The Wisconsin Conference Creation Care Team invites you to a Saturday gathering, with an optional Friday overnight, at Daycholah Center. Designed for church leaders responsible for buildings and grounds, infrastructure, and green teams, this event will focus on practical steps toward sustainability. Learn how an energy audit can identify opportunities to reduce utility costs, free up resources for ministry, and lower your congregation's carbon footprint.

Hear from experts including Laura Lane of Faith in Place, Megan Link of Focus on Energy, and Victor Nino from the sustainable building industry. You will leave with practical, money-saving ideas to implement right away and a glimpse of the sustainability initiatives underway at Daycholah Center.

May 2nd, 2026
